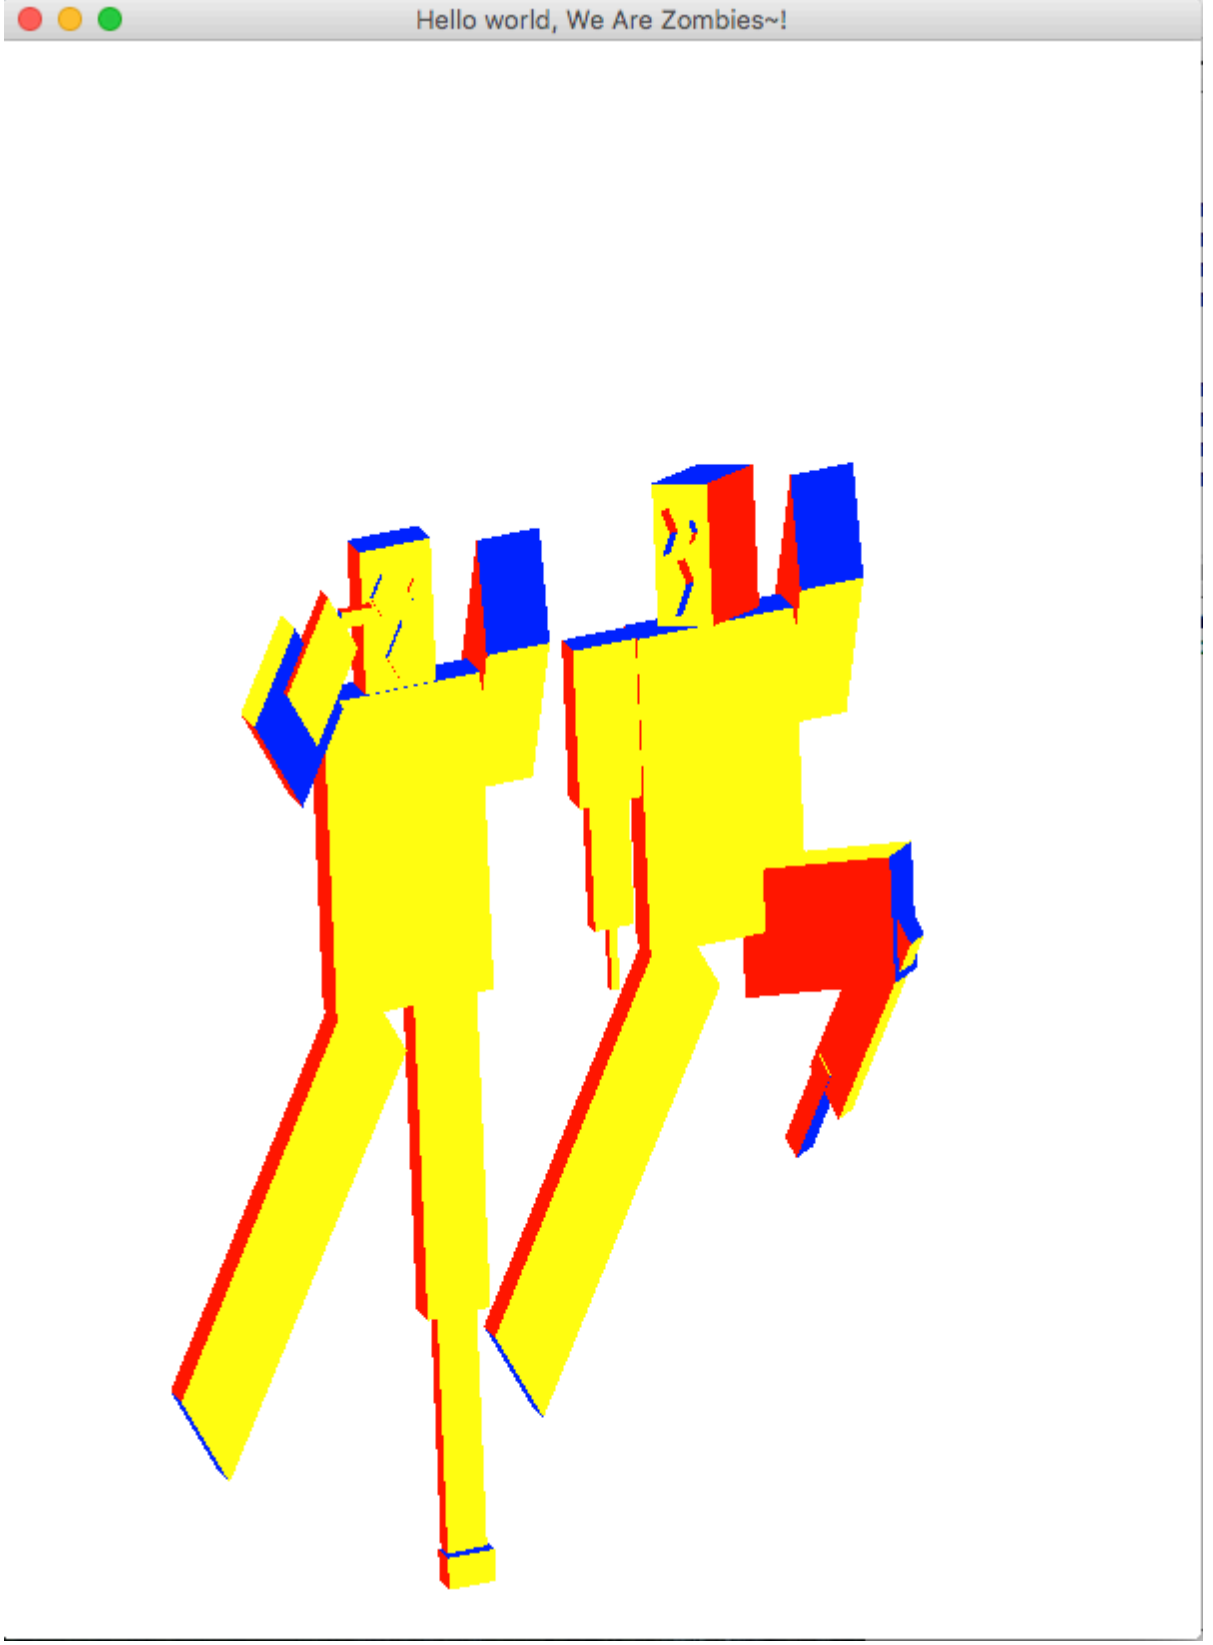
Contents

1 Introduction

- Spiderman texturing: debugging.
- Todos:
  - Rendering my team buddy's spiderman as dancing stage, debugging. I guess I will have to manually normalize my cubes' vertex data in order to make the textures work.
  - Need try hard to figure out animation, how to dance with time changes (has not really got ideas today), or need to move according to keytype inputs triggers.
  - Figured out how should I traverse a zombie every time, and there should be a bunch of zombies are coming~
  - Sub obj% for cubes, and spheres if I need and want to implement any sphere for head, or eyes.
- A current rotatable zombie and my team buddy's spiderman are looking like:



Hello world, We Are Zombies~!
